

For 12 years I have been trying to acquire a radio station, but cannot due to all the stupid rules and regulations your office imposes, I'm on the internet, a Christian music station, 24-7 no commercials , no time checks , no station ID's, but cannot acquire a local FM freq. in my area,, first I don't agree with the idea of allowing translators to come into an area where you can't put a local station, second, majority of these stations are from who knows where, and not worth listening to, as to LPFM, too many are trying to run commercial station , bending all your rules as to why LPFM was set up ,,non-profit ,, why don,t you help the little guys with you rules and regulations and stop helping the rich get richer.
